## **DETAILED ACTION**

### ***Election/Restriction***

1. Applicant's election without traverse of Embodiment I I, claims 1, 3, 5 and 7 is acknowledged.

### **Claim Rejections - 35 USC § 102**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims are rejected under 35 U.S.C. 102(b) as being anticipated by Kitamura et al. (US 5,844,275).

Regarding claim 1, Kitamura et al. discloses a LDMOS device comprising: a gate region including a gate (7) and a gate oxide (6); a body region (8) under the gate region; and an enhanced drift region under the gate region, whereby the enhanced drift region overlaps the lateral tail of the body region. See Fig.3B.

Regarding claims 3, 5 and 7, as shown in Kitamura et al.'s Fig.3B, a drain region (11) within the enhanced drift region.

Art Unit: 2811

The term "purposely" in claims 1, 5 and 7 does not add any "structure limitation" into claims and is considered as an "intended use limitation". Ex parte Masham, 2 USPQ2d 1647. Claims directed to apparatus must be distinguished from the prior art in terms of structure rather than function. In re Danley, 120 USPQ 528, 531 (CCPA 1959). "Apparatus claims cover what a device is, not what a device does." (emphasis in original) Hewlett - Packard Co . v. Bausch & Lomb Inc., 15 USPQ2d 1525, 1528 (Fed. Cir. 1990). In apparatus, article, and composition claims, intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art.
